

Walk Behind 26" Battery Sweeper NU26WAS

Specifications

Battery type:	6 volt, 235 AH, deep cycle
System:	12 volt
Run time:	Up to 4 hours
Length:	56"
Width:	26"
Height:	39"
Weight:	165 lbs w/o batteries
Drive:	Self propelled - belt 0 - 2.5 mph
Debris hopper:	43 quart
Construction:	Rotationally molded polyethylene Powder coated steel
Warranty:	12 - 3 warranty

Versatile

The NuSource Battery Powered Sweeper is designed for high productivity and reducing labor costs when sweeping outdoor areas or carpeting. The direct throw action of the main broom picks up and throws debris directly into the hopper while the impeller fan filters fine dust through a panel filter. The large filtering surface (30 square feet) retains dust and fine debris very effectively and is easy to remove for cleaning. The impeller can be turned off when sweeping damp surfaces to stop potential moisture from reaching the fan and filter. Cleaning corners and along baseboards is accomplished by the adjustable side brush.

Operation & Speed

The sweeper is activated by applying pressure to the handle. The units speed is increased by applying more pressure to the handle. Capable of sweeping up to 28,000 square feet per hour and over 100,000 square feet per charge, the NuSource Battery Sweeper is a sure way to increase productivity. It reduces labor costs and dramatically improves cleaning and maintenance operation.

Brushes

Different types of brushes are available for different applications. The standard main broom and side broom have polypropylene bristles and are the most versatile. A mixed steel main and side broom are available for strictly outdoor applications or extremely rough surfaces. A natural fiber main broom for fine dust or glossy surfaces is also available.
