Construction:	Rotationally molded polyethylene Glass filled nylon (switch box) Chrome plated steel
Length:	29"
Width:	21"
Height:	50"
Weight:	67 lbs
Warranty:	12 - 3 warranty

### Versatility

The NuSource High Speed burnisher is designed and built for the requirements and challenges of everyday use. A flexible pad driver combined with the ability to lock or 'float' the handles enables the floor to be quickly restored. 'Floating' the handle allows the pad and machine to float over the floor giving a great shine on uneven floors. The amount of head pressure can be increased by simply locking the cam handle which gives the machine a little extra power to remove stubborn black heel marks.

### Quality

An hour meter is standard on the NuSource burnisher. The hour meter is powered by a small 20 year battery that is always on, displaying the operation time of the machine. It will also let you know when it is time to check the carbon brushes on the DC rectified motor. The micro switch in the switch box functions as a very effective safety device. Simply pull the safety back, squeeze the lever and the pad starts spinning. The Rotationally molded base and glass filled nylon switch box and levers are warranted for 12 full years. A 3 year warranty covers the rest of the machine. NuSource high speed burnishers will deliver many years of trouble free service: *We Guarantee It!*
