Performance

The NuSource Riding Burnisher provides all around visibility and productivity up to 44,000 square feet per hour. The 27" burnishing pad results in low noise operation for large areas. It features a passive dust control system which picks up dust, pad fibers and fractured floor finishes. A disposable paper bag allows easy and convenient replacement when the bag is full.

Convenience

Power cords, access to electrical outlets or the need for propane powered units are eliminated with this machine. The high speed and pad pressure result in beautifully, well maintained and durable floors with the convenience and speed of a rider. Standard features include a flashing caution light, key switch, safety seat micro sensor and dynamic braking. Ergonomic operator controls and excellent visibility make the NuSource riding burnisher really shine.
